DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species, from each of the eight groups of species, of the claimed invention:

I. Device

Species A: Figure 1

Species B: Figure 3

II. Openings

Species A: Cylindrical (Figure 14)

Species B: Tapered (Figure 15A)

III. Thickness of openings

Species A: Through opening (see, for example, claim 4)

Species B: Recess (see, for example, claim 5)

IV. "Shape" of therapeutic substance

Species A: Discrete layers (Figure 9)

Species B: Layers of microspheres or particles (Figure 14)

Species C: Inverted cone (i.e., conical plug: Figure 16A)

Species D: Spherical plug (Figure 17A)

Species E: Cylindrical layers (Figure 19)

V. Therapeutic substance

Species A: Chemically ablative agent (embodied in independent claim 38)

Species B: Anti-arrhythmic drug (embodied in independent claim 40)

Art Unit: 3738

VI: Beneficial agent

Species A: Paclitaxel (see, for example, claim 23)

Species B: Rapamycin (see for example claim 24)

VII. Plurality of beneficial agent layers

Species A: Layers of different chemical compositions (see, for example, claim 6)

Species B: Layers with the same chemical composition (see, for example, claim 11)

VIII. Systemically applied agent

Species A: Ultrasound (see, for example, claim 15)

Species B: Chemical agent (see, for example, claim 16)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, from each of the eight groups of species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3738

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
